Subject

This box plot displays the distribution of tenure for 40 subjects. The y-axis, labeled 'Tenure', ranges from 0 to 15 with major grid lines every 5 units. The x-axis, labeled 'Subject', has 40 tick marks corresponding to each subject. Each subject's data is represented by a box plot. The boxes are white with black outlines, showing the median (horizontal line inside the box), the interquartile range (the box itself), and the full range of the data (the whiskers). Outliers are represented by solid black circles. The plot shows a wide variation in tenure across subjects, with some subjects having very low tenure (median near 0) and others having higher tenure (median around 3-5). Notable outliers include Subject 14 with a tenure of approximately 10, Subject 24 with a tenure of approximately 15.5, and Subject 34 with a tenure of approximately 5.

Subject	Min	Q1	Median	Q3	Max	Outliers
1	0.5	1.0	2.0	3.0	5.5
